Why choose the Unomedical Medical Products Range?

Internationally recognised 'best practice'

Unomedical leadership in performance quality, manufacturing excellence, and local responsiveness makes for elegant, predictable solutions to a broad spectrum of healthcare situations.

From feeding tubes to urine meters, from dialysis connectors to disposable instruments, reliability at sensible cost is the Unomedical philosophy.

Gastroenterology

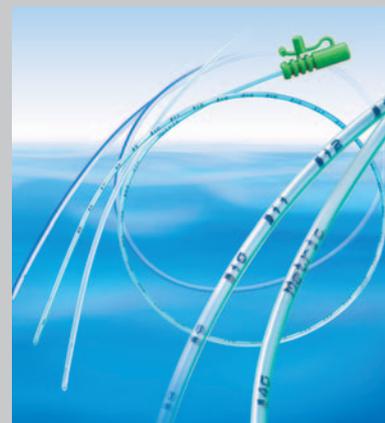

Phthalate-free products for patient protection, Unomedical offers purpose-specific GI products for everyone from premature infants to frail aged. The range includes:

- Feeding tubes
- Infant feeding kits
- Willis kits
- Enema bags
- Bile bags

Drug and Fluid Administration

Made from carefully-developed, medical grade polymers, the range features:

- Extension sets
- Extension tubes (male to female)
- Stopcocks (with or without extension tubes)
- Infusion adaptors and accessories
- Flow adaptors

Extensive Drug and Fluid Administration product range

ns to our customers

Urine Meters

Only the very best urinary measurement options manufactured in Australia from local and overseas resources.

- UnoMeter Safeti 100% Closed System
- Urinometer 4Sure long term, sterile, closed system
- Urinometer 4Sure 200mL – with accurate, bottom-outlet burette.

Single Use and Autoclavable Medical Consumables

The choice of many Australian ORs and other hospital departments. Supplied bulk packed and/or sterile packed as required.

- Mixing cannulae
- Apparel
- Instruments
- Containers
- Tube connectors
- Miscellaneous

Easy to use and flexible range of Urine Meters

Unomedical offers a large range of Medical Consumable items

Gastroenterology

FEEDING TUBES

Feeding Tubes

- Tubes for gastroenterology come into contact with mucous membranes in the alimentary canal. Because the gastrointestinal tract is designed to absorb nutrition, it also tends to draw phthalates out of medical devices into the body. This is why all Unomedical Feeding Tubes are manufactured from DEHP (Phthalate) free material and have been certified for extended use; up to 4 weeks in situ.
- The Feeding tube is soft and comfortable for the patient
- The X-Ray line is consistent in width and density for identification under X-Ray.

Ryles Tubes, Duodenal Tubes and Rectal Tubes

- All Duodenal, Ryles and Rectal Tubes are manufactured from DEHP (Phthalate) free material and have been certified for extended use.
- The Ryles tubes are packed with a luer adaptor in addition to the funnel connector which reduces inventory levels.
- Graduations are marked off at every centimetre for improved accuracy of placement.
- An X-Ray line is incorporated into our range of Ryles tubes.

Feeding Tubes WITH X-RAY LINE

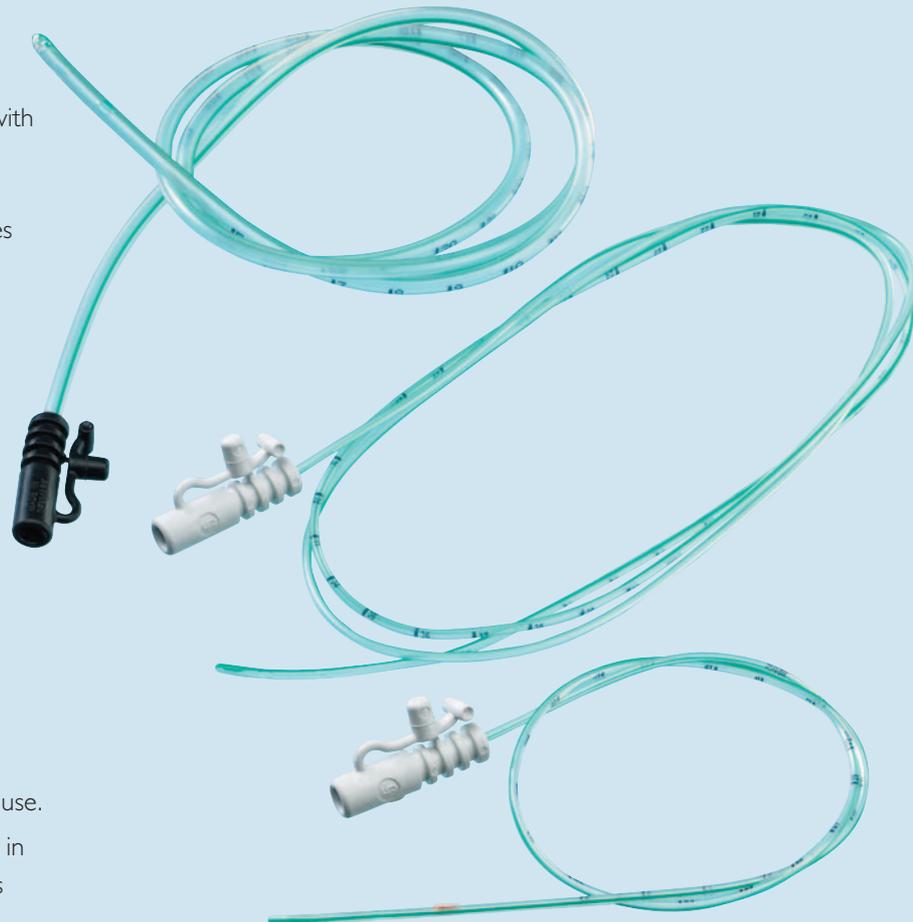

For nasogastric feeding of neonates and infants. Also used for diagnostic and therapeutic aspiration. Flexible adaptor with closure fits standard luer tip syringes.

Tube has 2 lateral eyes, rounded tip and fitted with a female luer adaptor:

Markings from distal end for 40 cm tube: 200 mm

Markings from distal end for 100 cm tube: 250, 500, 750 mm

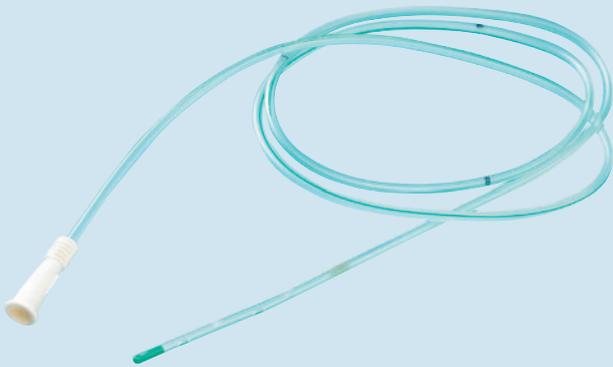

Sterile, peel pack.

11006182	FG 18	6.0	125 cm	50

Duodenal Tube with X-Ray Line (Stomach Tube) WITH FEMALE CONNECTOR (LEVINSTYPE)

For the aspiration of fluids from the stomach and intestine, and used in the diagnosis and treatment of digestive track disorders. Also used for intermittent feeding and administration of medications. Tube is fitted with female connector; has 4 lateral eyes and closed tip. Markings from distal end: 460, 560, 660, 760 mm
Sterile, peel pack.

REF.	Tube Size	OD mm	Effective Length	Qty/ Box

234.08.002	FG 8 X 5	2.7	36 cm	50

Gastroenterology

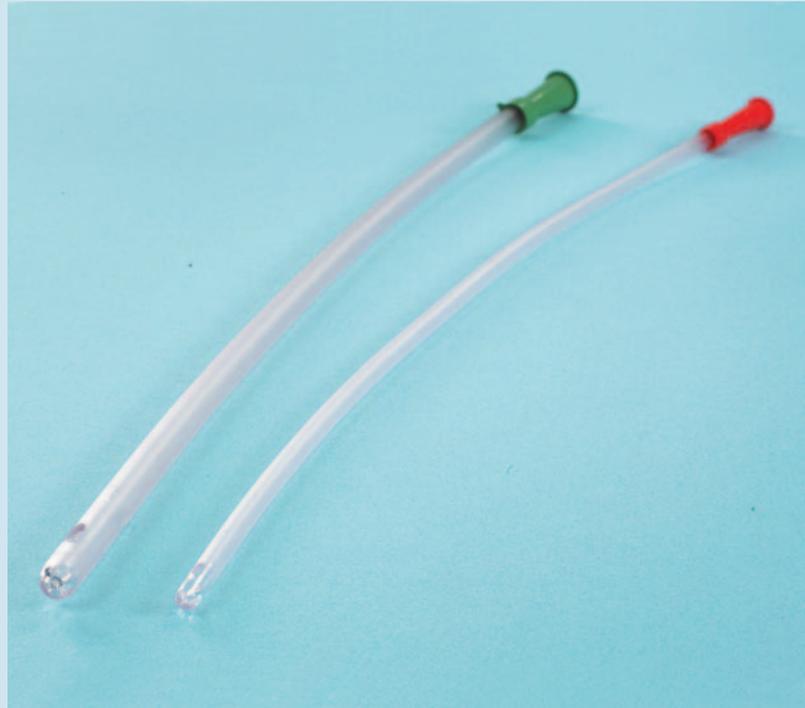

FEEDING TUBES / MISCELLANEOUS

Rectal Tubes

Used for administration of medication or drainage of rectum. Soft tube featuring a rounded tip with two lateral holes for atraumatic insertion. Larger tubes are fitted with soft flexible female connector. Sterile, peel pack.

REF.	Tube Size	OD mm	Effective Length	Qty/ Box
I4003182	FG 18	6.0	40 cm	100
I4006182	FG 20	6.7	40 cm	100
I4008182	FG 22	7.3	40 cm	100
I4010182	FG 24	8.0	40 cm	100
I4012182	FG 25	8.3	40 cm	100
I4016182	FG 28	9.3	40 cm	50

Rectal tubes are used following intestinal surgery to alleviate seepage and/or diarrhoea. The mucous membrane in the rectum absorbs drugs to the organism almost as quickly as an intravenous injection. Therefore, the use of phthalate-containing devices should be avoided in this area.

Bile Bag

Bag is graduated and has a capacity of 350 mL. Bag is fitted with male connector on inlet tube (which fits connectors with 6-9 mm ID), a non-return valve and a t-tap outlet valve.

Individually packed and sterile.

REF.	Qty / Box
080021S	50

Willis Kit

For administration of home based bowel washouts. 1.5 litre capacity with press lock closure, 1.5 m tube with male connector; 6 x Fg 25 rectal tubes, cleaning brush and instruction leaflet.

Individually packaged in peel pack, sterile.

REF.	Qty / Box
942.00.150	25

Drug and Fluid Administration

EXTENSION SETS

Stopcocks

Our range of luer lock and luer slip stopcocks are made from medical grade polymers, featuring minimal dead space with uniform bore to ensure maximum infusion flow and prevention of turbulence and formation of air bubbles. All have a deadspace of 0.2mL.

The stopcocks are designed to withstand pressures on all normal medical procedures and available in both luer slip or luer lock form.

Sterile, peel pack.

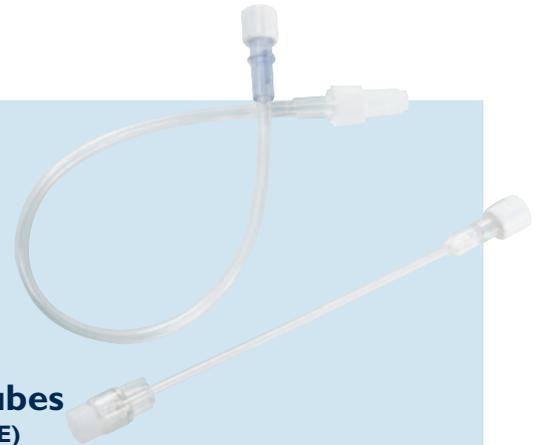

REF.	Description	Qty / Box
636.03.002	3 Way with luer slip (clear)	250
636.03.010	3 Way with rotating luer lock nut and capped ports (clear)	250

Stopcocks with Extension Tube

3 Way stopcock with integral extension tube.
Sterile, peel pack.

REF.	Description	Qty / Box
637.16.010	Luer lock with 10 cm tube (clear). Volume = 0.2mL	100
637.16.100	Luer lock with 100 cm tube (clear). Volume = 2.0mL.	100

Extension Tubes (MALE TO FEMALE)

For intravenous solution administration with luer lock connectors. Sterile, peel pack.

673.02.003	Y-Adaptor - Luer Lock with rotating nut, capped ports	100

FLOW ADAPTORS

Flow Adaptors

Used for the administration of intravenous fluids and medications. Luer lock connections on all ports.

"2 in 1" flow adaptor with luer lock (2 female x 1 male), shut-off colour coded clamps and long bottom tube (45 mm). Set Capacity = 1.6mL

REF.	Qty / Box
675.12.002	100

"3 in 1" flow adaptor with luer lock (3 female x 1 male), shut-off colour coded clamps and short bottom tube (25 mm). Set Capacity = 2.2mL

REF.	Qty / Box
675.12.003	100

"3 in 1" flow adaptor with luer lock (3 female x 1 male), colour coded shut-off clamps and long bottom tube (45 mm). Set Capacity = 2.4mL

REF.	Qty / Box
675.12.009	100

"4 in 1" flow adaptor with luer lock (4 females x 1 male), and colour coded shut-off ratchet clamps. Set Capacity = 3.5mL. Each branch = 1.3mL.

REF.	Qty / Box
675.12.004	100

Connecting Tube for Peritoneal Dialysis

Connects from dialysing solution to catheter. Sterile, peel pack.

Cat. No.	Tube Size	OD mm	Effective Length	Qty/box
680.22.050	22 FG	9.3	50cm	200

Urine Meters

UnoMeter Safeti 2000ML LATEX FREE

UnoMeter Safeti's superiority in preventing retrograde contamination has been documented in clinical trials¹. This is due to a series of design innovations:

- a non-return valve built into the connector preventing residual urine from re-entering the Foley catheter
- a non-return valve in the collecting bag preventing retrograde infection^{1,2}
- double-lumen tubing minimising urine stasis in the tubing

In addition the compact design of UnoMeter Safeti reduces the risk of floor contamination. Recommended time of use: up to 7 days.

The convenient tap on the bag can be tucked away to reduce overall length to a mere 28 cm from the bed rail

Large 2000ml bag with graduations

Short form instructions on bag

EASY TO USE

- great fixation flexibility during installation
- handy fixing straps and hooks (square or round)
- soft tube for convenient tubing placement
- large scale and digits for convenient, accurate reading
- "vertical flush" empties the chamber in less than 30 seconds
- large open/close handle for easy one-hand operation
- hygienic, easy-to-use bottom outlet
- short-form instructions on bag
- convenient needle-free sample port (Kombi Kon)

REF.	Description	Qty
25114182	UnoMeter Safeti with straps & 1.5m tubing	14
25116182	UnoMeter Safeti with straps, 1.5m tubing & Round Hook	14
8607357	Round hook / hanger	10
8607557	Square hook / hanger	10

UnoMeter Safeti can easily be transported face down without compromising measurement accuracy

¹ "Retrograde contamination: an in vitro comparison of four systems for the measurement of hourly diuresis" (article submitted) (Niels Frimodt-Møller and Lotte Corneliusen. National Center of Antimicrobials and Infection Control, Denmark, August 2004)

² "An assessment of the ability of a silver-releasing device to prevent bacterial contamination of urethral catheter drainage systems" (D.J. Stickler. British Journal of Urology (1996), 78:579-588)

³ "Performance of Kombikon needle free sample port" (Michael Tvede, Department of Clinical Microbiology, Rigshospitalet, University of Copenhagen, Denmark, July 2004)

Anti-kink spiral in tubing reduces risk of stasis

Bacteria-proof hydrophobic air vent

Top mounted drip chamber

Large open/closed handle ensures easy emptying and prevents urine residue forming in chamber

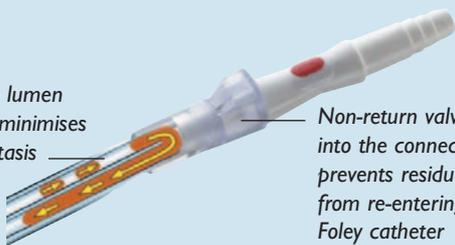

Large easy to read digits

Accurate 1ml graduations up to 40ml, 5ml graduations up to 110ml, 10 ml graduations up to 120ml and 20ml graduations up to 500ml

Bacteria-proof hydrophobic air vent

Non-return valve in the collecting bag prevents retrograde infection

Double lumen tubing minimises urine stasis

Non-return valve built into the connector prevents residual urine from re-entering the Foley catheter

**KOMBI KON™
UNIVERSAL
NEEDLE FREE
SAMPLE PORT**

The new Kombi Kon urine sample port eliminates the need for needles when taking urine samples, enabling nurses to easily take urine samples in a safe and convenient way.

A documented clinical trial has also shown that Kombi Kon can be used without risk of contamination in the system³.

Finally, Kombi Kon is a universal port and can be used with most standard syringes, thus eliminating the need for extra expensive cannulas.

Urinemeter 4 SURE 400ML BURETTE

Sterile, long term, closed system, two litre graduated bag with wide bore kink resistant 100cm tubing.

Needle free sampling port, non wettable breather filter, bed sheet clamp and wide bore bottom emptying tube with clamp. Complete with accurate 400ml bottom outlet burette.

Medical Consumables

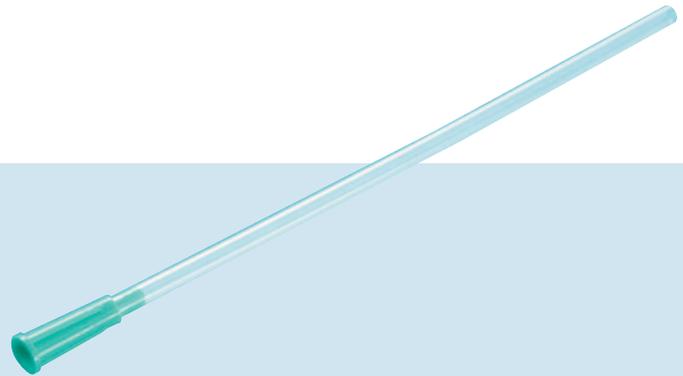

Shaver

The safety razor is a distinctive black with a tamper evident "sharps" yellow blade guard and cover. 2 cutting edges, for long and short hair. New design handle for better operation. Packed in ward issue packs of 50.

Bulk clean pack.

REF.	Description	Qty / Box
295.45.100	Shaver	250

Mixing Cannula

This is a very convenient and popular low cost device used for mixing of sodium pentobarbital (or any other crystalline injectable) with sterile water; transfer of fluids by aspiration with syringe also many other general hospital and pharmacy applications. Also used in tissue typing and transfer. The cannula as well as the luer adaptor is made of high grade polypropylene offering good chemical compatibility with parenterals, weak acids and organic solvents.

Available sterile or bulk. Cannula length is 12.5 cm

REF.	Description	Qty / Box
500.11.012	Peel pack, sterile	500
